PROJECTS

Online Shopping Website (11/2023 - 02/2024)

- I Create this Project with Core Java, Advanced Java and MySQL Database There are some modules like seller, customer, admin, product, cart, wishlist etc.
- I also Used Html , CSS, JavaScript, JQuery for some Front end Work. Seller Can Add and Maintain Their Product, Customer Can Add any Product to Wishlist and Cart and Purchase it.
- I Used here JDBC API for Database Connectivity. I also used JSP and Servlet for give request to server and take response from it. If any Customer or Seller forgot their password, then I used Google mail API integration to give OTP through email and also Used Razor pay API for Payment Gateway through which Customer can Purchase any Product. In Last Admin Can Saw All Sellers and Customers.

Note Taker Application (03/2024 - 04/2024)

- This is Simple and Small Basic Note Taker Application.
- In this App Backend Functionality is Created in Core JAVA, JSP/Servlet, and Hibernate ORM Tool to Interact with Database. In this Application such modules are there like Add notes, Show notes and data is forward through Servlet Functionality.
- You can add Any number of note for remembering purpose and it is useful for daily life for taking notes. It's Very Simple so anyone can use it.
- MySQL is Used as Database to Storing data and Desing Part is Design through HTML,CSS and Bootstrap.

Go-Mart Application (ASP.NET) (01/2023 - 03/2023)

- This is My College Final year project. It is on Online Shopping Mart Project .
- I give Go-Mart Application name to it. In this Project I use ASP.NET Framework with MVC structure and SQL server Database.
- fter Login First Welcome Page Display with One Nav-bar with Different Modules Category, Products, Report, Add User, About us and Exit.
